- **Languages & Technologies:** JavaScript, HTML5, CSS3
 - **Frameworks/Libraries:** React.js, Node.js, Express.js, Bootstrap
 - **Databases:** MongoDB, Firebase
 - **Tools:** Git, GitHub, VS Code
 - **Other:** Responsive Web Design, API Integration, UI/UX Principles
-

Projects

Weather App

A simple real-time weather app that fetches weather data using OpenWeather API. Displays current temperature, humidity, and forecast by city.

Movie App

A searchable and filterable movie app that allows users to browse and explore movies using various filters (e.g., title, rating, genre).

Personal Portfolio

A fully responsive website showcasing my skills, services, and projects as a developer. Designed with a focus on UI/UX and interactivity.

Experience

Freelance Full-Stack Developer

Remote — 2023 to Present

- Designed and built full-stack applications for local businesses and personal projects.
 - Integrated REST APIs and ensured mobile-first design.
 - Maintained GitHub repositories and collaborated on small freelance tasks.
-
